Minor:

If major is undecided, areas of interest:

Please answer the following questions:

1. Are you currently a ____ Freshman, ____ Sophomore, ____ Junior, ____ Senior, or ____ Post-Bac?

1a. If you are a senior, when do you plan to graduate? _____

2. Have you taken an online course? ____yes, ____no

2a. If yes, what online course(s) have you taken? Please list the course and the school at which it was taken.

Course	University	Semester Enrolled	Grade Received

3. Why do you want to take Business Calculus in an online setting?

4. Have you taken and passed College Algebra? ____yes ____no

4a. If yes, answer the following:

i. At what university did you take College Algebra?

ii. When did you take the course?

iii. What grade did you receive?

4b If no, you must have received credit for College Algebra.

i. Did your ACT Math score place you into Business Calculus? ____yes, ____no

ii. Did your SAT Math score place you into Business Calculus? ____yes, ____no

iii. If you answered yes to one of the Math score questions, what was the score?

iv. If you answered no to both questions, what placement criteria were used?

5. Have you taken Business Calculus (or its equivalent) in the past – either online or in a traditional classroom? ____yes, ____no
- 5a. If yes, answer the following:
- Where did you take Business Calculus?
 - When did you take the course?
 - What grade did you receive?
 - Was this an online course?
6. Although this is an online class, all exams will be proctored. UALR has a Managed Testing Room during the Fall and Spring semesters where tests are administered. Select one:
- I live within 60 miles of UALR's campus and will be testing on campus.
- I do not live within 60 miles of UALR's campus and will be using a proctor. This proctor (an educator or testing services coordinator) will be _____ and his/her email address is _____.
7. This online course takes a lot of time and effort. On average, a student spends 5 to 10 hours per week; however, more time could be involved due to test preparation, extra practice, tutoring, etc. Due dates are "rolling" and occur often which means students must work on the course regularly and consistently. It is a regular college-level course and demands work during the week. This is not a class that you can do only on the weekends. Select one:
- I have a busy life, but I can carve out an hour or so every day or two hours every other day to prepare for this course.
- I have a busy life, and I do not have 5 – 10 hours or more to devote to this course.
8. This is an online course which requires all work to be done via the internet and on a computer with high-speed-internet access. All homework and quizzes are done via a mathematics website, and all communication is done via email or Blackboard. Select one:
- I have daily access to a computer with high-speed-internet access and will be able to check my email and Blackboard daily.
- I do not have daily access to a computer with high-speed-internet access and can only check my email and Blackboard sporadically.
- I do not have access to a computer with high-speed-internet access.
